**Crowley chooses Redline's WiMAX products  
for broadband network in Poland**

*-- Crowley Data to launch Poland's first WiMAX services in March using RedMAX, the world's first complete WiMAX Forum Certified® system --*

**POLAND, EUROPE —March 13, 2006—**Redline Communications Inc., a leading provider of standards-based broadband wireless equipment, today announced its RedMAX WiMAX products, the world's first complete WiMAX Forum Certified™ system, will be used to establish a first certified WiMAX broadband network in Poland, Central Europe's largest telecommunications market with Crowley Data Poland.

Crowley, Poland's fastest-growing telecommunications services provider, has initiated deployment of Redline's RedMAX products for a city-wide WiMAX wireless broadband network in Krakow, Poland. Crowley will begin offering its new WiMAX services to business customers in the region starting in March 2006. The Company plans to expand its WiMAX network deployment to other markets in Poland in the coming months.

"Wireless technologies are enabling companies to thrive in the highly-competitive telecommunications market in Poland. With Redline's certified products, WiMAX is now a reality, allowing us to quickly and cost-effectively bring the most advanced communications services to our customers. These include voice, broadband Internet access and data transmission services. Our hope is to continue our fast growth and expand our customer base, in particular in the small and mid-size enterprise market," said Jaroslaw Roszkowski, Chairman Crowley Data Poland. "With the launch of our WiMAX services, businesses in the largest Polish cities will be among the first in the world to experience the benefits of true WiMAX connectivity, such as standardized equipment or lower cost of infrastructure"

"As one of the first in the world to choose Redline's RedMAX products, Crowley Data Poland has demonstrated it has a clear vision of being among today's most advanced communications providers," said Majed Sifri, President and CEO, Redline Communication Inc. "We look forward to working with Crowley Data as they expand their WiMAX strategy to markets throughout Poland."

**Redline's RedMAX Family**

Redline's RedMAX family includes one of the first WiMAX Forum™ Certified products in the world. RedMAX consists of a RedMAX carrier class Base Station (AN-100U) which delivers voice, video, and prioritized data

traffic to the indoor and outdoor RedMAX Subscriber Units, which feature the Intel® PRO/Wireless 5116 broadband interface.

#### **About Crowley Data Poland**

Crowley Data Poland is a leading provider of data transmission, voice and Internet access services in Poland. The Company targets primarily the business and government sectors, providing its customers with sophisticated solutions to their most complex telecommunications needs. Crowley's backbone network infrastructure is fully redundant, contributing to the excellent quality and reliability of its services (and high levels of customer satisfaction and loyalty). All services provided by the Company are covered by a Service Level Agreement (SLA). In 2004, the Company was qualified by RIPE NCC (Reseaux IP Europeens) to the prestigious "Class LARGE", which includes only the top 5% internet operators in Europe, the Middle East, Central Asia and North Africa.

Additional information on the company and its portfolio of services is available on-line at [www.crowley.pl](http://www.crowley.pl) or 0-801 108-801.

#### **About Redline Communications**

Redline Communications is a technology leader in the design and manufacture of standards-based broadband wireless access solutions. Using industry leading OFDM technologies, Redline's award-winning products provide unmatched high capacity and non-line-of-sight capabilities with proven performance, reliability and security. Ideal for a variety of access, backhaul and private network applications, Redline products meet the needs of carriers, service providers and enterprises worldwide. Redline is a principal member of the WiMAX Forum™, and was first in the world to deliver an 802.16 compliant product. Redline has over 20,000 installations in 75 countries across six continents through a global distribution network of 80+ partners.
