NEWS RELEASE – FOR IMMEDIATE RELEASE

Pipeline Wireless Chooses Redline Communication's RedMAX™ WiMAX Forum Certified® System to Support WiMAX Network

-- RedMAX solutions will form the foundation of a feature-rich network unmatched in quality of service --

Woburn, Mass. and Markham, ON.– August 20, 2008 – Pipeline Wireless, Boston's leading wireless broadband provider, and Redline Communications Inc. ("Redline") (TSX and AIM:RDL), a leading provider of standards-based WiMAX and broadband wireless infrastructure products, today announced that Pipeline Wireless has chosen Redline's RedMAX™ products to support its first WiMAX network.

Pipeline Wireless is deploying Redline's RedMAX products for its high capacity WiMAX network in downtown Boston and plans to launch its WiMAX services in the fall. Pipeline Wireless is the first company in Boston, Massachusetts to install Redline's technology and deliver true WiMAX services.

"We are excited to expand our relationship with Redline as we deploy our first of many WiMAX base stations," said Michael Daly, President and CEO, Pipeline Wireless. "Because we can monitor and manage our existing and new Redline equipment from a single management platform, we will incur significantly lower operational costs for managing and provisioning our customers' services," added Daly.

"By choosing RedMAX, Pipeline Wireless can quickly deploy a WiMAX network in downtown Boston that will enable its customers to enjoy new levels of services," said Kevin Suitor, Vice President of Marketing and Business Development, Redline Communications. "Pipeline Wireless can incrementally expand its network as it grows and realize a return on investment at each phase of deployment."

Pipeline chose Redline's carrier-class RedMAX™ AN-100U Base Station for its unmatched support of voice, video and prioritized data traffic, which enables long-range, high-capacity wireless broadband networks. Redline is a WiMAX industry leader with over 166 deployments worldwide. Redline was the first equipment vendor to have its products WiMAX Forum Certified as well as FCC Certified for the 3.65 GHz spectrum in the United States. Redline's conformance to the WiMAX standards for performance and interoperability, as well as its high level of support, was of enormous importance to Pipeline Wireless in its decision to choose Redline's equipment.

Redline's RedMAX™ Family

Redline's RedMAX™ family of WiMAX solutions includes the world's first complete system to receive the WiMAX Forum Certified™ mark for conformance to the WiMAX standards for performance and interoperability. Redline's carrier-class RedMAX™ Base Station (AN-100U) supports voice, video, and prioritized data traffic, enabling long-range, high-capacity wireless broadband networks. Redline's WiMAX products also include the RedMAX™ Indoor Subscriber Unit (SU-I) and Outdoor Subscriber Unit (SU-O) designed for enterprise and residential services. The RedMAX™ Management Suite enables operators to monitor and control the network, ensuring high service availability. Redline is maintaining its WiMAX leadership with the expansion of its RedMAX™ family to include products for additional frequency bands, applications and standards.

RedMAX 4C™ Mobile WiMAX

The RedMAX 4C™, which is based on the WiMAX industry's 802.16e-2005 standards for mobile WiMAX, supports a wide range of fixed, portable and mobile wireless services including Voice and Video over IP, broadband Internet access used to support highly valued education, medical, transportation and municipal applications, VPNs (Virtual Private Networks) and other advanced communications services. The RedMAX 4C™ Mobile WiMAX platform is designed to enable operators to maximize the reach and customer density required for a profitable carrier business model. The RedMAX 4C™ includes a modular, standardized µTCA (micro Telecommunications Computing Architecture) chassis base station that is small, lightweight and easy to deploy. RedMAX 4C™ will also include a suite of indoor and outdoor fixed and portable end-user devices including laptops, mobile handsets and PDAs. Redline's new WiMAX offering is also designed to facilitate the integration of its existing RedMAX™ products with its RedMAX 4C™ technologies, providing operators a path to true mobility.

About Pipeline Wireless

Pipeline Wireless is Boston's leading wireless Internet Service Provider, delivering fast, reliable and affordable high-speed Internet access to hundreds of businesses throughout Eastern Massachusetts. Pipeline's scalable and secure broadband services are delivered to businesses over a state-of-the-art fixed wireless network that guarantees "always on" Internet access at T-1 and higher speeds. The company, founded in 2003, pledges quick installation at a cost 40 to 60 percent lower than traditional Internet Service Providers and the company's exceptional Service Level Agreement (SLA) guarantees bandwidth, low latency, low packet loss and 99.99 percent uptime.
