**NEWS RELEASE – FOR IMMEDIATE RELEASE**

**Redline’s Broadband Wireless Products chosen by Orascom Technology Solutions to connect QARUN Petroleum properties in Egypt**

*QARUN to link multiple drilling rigs with its head office using Redline’s award-winning RedCONNEX products*

**TORONTO, ON – April 2, 2008** – Redline Communications Group Inc. (TSX and AIM: RDL), a leading provider of standards-based WiMAX access and broadband wireless infrastructure products, today announced that Orascom Technology Solutions (OTS), a Summit Technology Solutions Company, and Qarun Petroleum, a leading oil and gas company in Egypt, have chosen Redline’s award-winning RedCONNEX™ broadband wireless products to connect multiple drilling rigs to Qarun Petroleum’s head office.

“After a thorough review of available technologies, we selected Redline’s RedCONNEX solution to provide us with reliable, secure and high-throughput links,” said Sherief Ramadan, Telecomm Manager Engineer, Qarun Petroleum. “In just a few months, Redline’s broadband wireless solution has proven to be much more cost-effective than existing VSAT systems delivering faster and more reliable connections, and resulting in a saving of hundreds of dollars each day in infrastructure costs. We expect to realize a return on investment for our RedCONNEX network in less than a year, enabling us to further expand our business.”

The oil drilling rigs platforms owned by Qarun are located up to 30 kilometres (18 miles) from Qarun Telecom Center. In addition, Qarun Petroleum is establishing a new point-to-multipoint RedACCESS™ network, which will connect to its existing RedCONNEX network. Redline Certified Partner and systems integrator Orascom Technology Solutions, managed the network planning and installation of the RedCONNEX™ AN-50e network.

“Redline’s RedCONNEX products have been chosen by oil and gas companies around the world as a reliable and cost-effective way to transmit crucial, time-sensitive data, video and voice communications,” said Kevin Suitor, Vice President, Marketing and Business Development, Redline Communications Group Inc. “By working with OTS for its RedCONNEX network deployment, Qarun will benefit from the most proven solutions and experienced network planning and deployment capabilities available today.”

2/...

As specialists in deploying communications networks to meet the rigorous demands of the oil and gas sector, OTS selected Redline's broadband wireless infrastructure products.

"When it comes to delivering telecommunications solutions that meet the unique communications challenges of the oil and gas industry, Redline's products have outperformed other solutions," said Ali Makhoulouf, Telecomm Infrastructure Manager, OTS. "Redline's RedCONNEX offerings deliver the scalability required to allow Qarun to grow its network as it expands its business."

### **Redline's Broadband Wireless Infrastructure Solutions**

#### **RedACCESS™**

Redline's newly-branded RedACCESS family of broadband wireless infrastructure products have been deployed by companies worldwide to support a range of applications including mobile backhaul, video surveillance, storage and business continuity, premium internet access, and other voice, video and data services. The RedACCESS product family includes the AN-50e high speed wireless point-to-multipoint (PMP) Ethernet bridge, and the point-to-multipoint AN-80i broadband wireless backhaul solution. Operating in the 4.9GHz, 5.4 GHz and 5.8 GHz spectrum bands, the RedACCESS family leverages Redline's proven OFDM technology to deliver industry-leading, high-speed Ethernet throughput up to 48Mbps and flexible software defined configurations.

#### **RedCONNEX™**

Redline's RedCONNEX family of broadband wireless infrastructure products have been deployed by companies worldwide to support a range of applications including mobile backhaul, video surveillance, storage and business continuity, premium Internet access, and other voice, video and data services. The RedCONNEX product family includes the AN-50e high speed wireless point-to-point (PTP) Ethernet bridge, the AN-30e carrier-grade TDM backhaul solution for mobility and enterprise network operators, and the new AN-80i broadband wireless backhaul solution. Operating in the 4.9 GHz, 5.4 GHz and 5.8 GHz spectrum bands, the AN-80i leverages Redline's proven OFDM technology to deliver industry-leading, high-speed Ethernet throughput up to 90Mbps and flexible software defined configurations. With its exceptional long range capabilities, the AN-80i is able to establish and maintain reliable and highly secure connectivity that can exceed 80 km (50 miles) in clear line-of-sight conditions.

#### **About Qarun Petroleum**

Qarun Petroleum Company (QPC) was established on August, 13th 1995, as an operating company for EGPC and the group consisting of Phoenix Resources Company of Qarun, Apache Oil Egypt Inc, and GNR Seagull at Qarun area of the Western Desert covered by the concession agreement between the government of A.R.E. (represented by EGPC) and the said group. Effective May 1996, Phoenix and Apache merged in Apache Egypt Inc., and by December 19th, Apache Egypt Inc. assigned and transferred all its assets to Apache Qarun Corporation I. D.C. On November 19th, 1995, early production started using temporary facilities with an average production rate of 3500 BOPD. By May 1997, QPC succeeded, to complete the permanent facilities and put the field on production with an average production rate of 38,000 BOPD.
