NEWS RELEASE – For Immediate Release**Redline and Starent Networks join forces to deliver complete Mobile WiMAX solution**

--Solution based on leading technologies and open standards will enable service providers to roll-out true Mobile WiMAX networks --

WiMAX WORLD 2008, Chicago, IL – September 30, 2008 – Redline Communications Group Inc. (“Redline”)

(TSX and AIM: RDL), a leading provider of WiMAX and broadband wireless infrastructure products and Starent Networks, Corp. (Nasdaq: STAR), a leading provider of infrastructure solutions that enable mobile operators to deliver multimedia services, today announced the two companies have formed a strategic alliance for the co-development of a complete Mobile WiMAX solution.

The joint solution will incorporate Redline’s RedMAX 4C™ family of Mobile WiMAX radio access network products and Starent Network’s ASN Gateway and Home Agent (HA) solution for mobile WiMAX networks, resulting in a complete carrier class solution. Redline’s RedMAX products and Starent’s ASN Gateway and HA are designed to enable service operators to expand their networks to support various access technologies and provide subscribers with 4G mobile services based on best-in-class equipment.

“By incorporating Starent’s ASN Gateway and HA solution with our mobile WiMAX products, which include our WiMAX Forum Certified® customer premise equipment, carriers will be able to enhance the subscriber experience while leveraging their current investments in core infrastructure and applications,” said Kevin Suito, Vice President of Marketing and Business Development, Redline Communications. An ASN Gateway is important to the roll-out of carrier-class Mobile WiMAX networks and Starent’s platform supports the high performance applications and advanced traffic handling required for a successful WiMAX network.”

“Redline is recognized among the most widely deployed providers of WiMAX Forum Certified systems. Redline’s experience will greatly enhance our ability to deliver a comprehensive mobile WiMAX solution that meets the needs of carriers,” said Thierry Maupilé, Vice President of Marketing and Business Development, Starent Networks.

“The combination of Redline’s industry leading WiMAX technology with Starent’s intelligent ASN Gateway and Home Agent is a key asset to network operators as it will provide a tool to deliver the capacity, features and

2/...

applications needed to deploy standards-based 4G mobile networks,” said Monica Paolini, Founder and President of Senza Fili Consulting, a leading analyst and consulting firm specializing in wireless data.

Redline’s agreement to partner with Starent Networks on a complete Mobile WiMAX solution is part of the Redline Ecosystem Verification (‘REV’) program, which ensures interoperability and support of advanced network management and communication services between Redline’s RedMAX 4C™ Mobile WiMAX and RedMAX™ family of WiMAX Forum Certified® products with devices and applications being developed by other companies in the WiMAX and communications ecosystems.

RedMAX 4C™ Mobile WiMAX

The RedMAX 4C™, which is based on the WiMAX industry’s 802.16e-2005 standards for mobile WiMAX, supports a wide range of fixed, portable and mobile wireless services including support for Voice and Video over IP, broadband Internet access used to support highly valued education, medical, transportation and municipal applications, VPNs (Virtual Private Networks) and other advanced communications services. The RedMAX 4C™ Mobile WiMAX platform is designed to enable operators to maximize the reach and customer density required for a profitable carrier business model. The RedMAX 4C™ includes a modular, standardized µTCA (micro Telecommunications Computing Architecture) chassis base station that is small, lightweight and easy to deploy. RedMAX 4C™ will also include a suite of indoor and outdoor fixed and portable end-user devices including laptops, mobile handsets and PDAs. Redline’s new WiMAX offering is also designed to facilitate the integration of its existing RedMAX™ products with its RedMAX 4C™ technologies, providing operators a path to true mobility.

Starent’s ASN Gateway and Home Agent Solutions

Starent’s ASN Gateway is a subscriber mobility access gateway for IEEE 802.16e Mobile WiMAX radio access networks. The ASN Gateway is designed to support connection management and mobility across cell sites and inter-service provider network boundaries through processing of subscriber control and bearer data traffic. The ASN Gateway serves as the Extensible Authentication Protocol (EAP) authenticator for subscriber identity and acts as a RADIUS client to the operator’s AAA servers. The Starent Home Agent acts as a subscriber anchor point maintaining the IP session as the subscriber moves through or across networks. The ASN Gateway and Home Agent are supported on Starent’s [ST16™](#) and [ST40™](#) multimedia core platforms — the preferred solutions for many of the world’s most successful mobile operators. This carrier-class platform boasts exceptional reliability and performance characteristics that allow Mobile WiMAX operators to enhance the subscriber experience.

About Starent Networks

Starent Networks, Corp. is a leading provider of infrastructure solutions that enable mobile operators to deliver multimedia services to their subscribers. Starent Networks has created solutions that provide mobile operators with the functions and services needed for access, mobility management and call control in their networks. Through integrated intelligence and high performance capabilities, Starent Networks’ solutions also enhance subscriber management, billing and session policy enforcement. The company’s products are capable of supporting a wide range of mobile wireless networks, such as UMTS, CDMA2000, WiFi, and WiMAX. Starent Networks’ products have been deployed by over 85 mobile operators in 35 countries. Additional information about Starent Networks is available at www.starentnetworks.com

About Redline Communications

Redline Communications (www.redlinecommunications.com) is the leading provider of fixed and mobile standards -based wireless broadband solutions. Redline’s RedMAX™ WiMAX Forum Certified™ system, RedMAX 4C Mobile WiMAX™ products, and its award-winning RedCONNEX™ and RedACCESS™ families of broadband wireless infrastructure products enable service providers and other network operators to cost-effectively deliver high-bandwidth services, including voice, video and data communications. Redline is committed to maintaining its wireless industry leadership with the continued development of WiMAX and other advanced wireless broadband products. With more than 100,000 installations in 85 countries, and a global network of over 170 partners, Redline’s experience and expertise helps service providers, enterprises and government organizations roll out wireless broadband networks to support advanced communications.

Certain statements in this release constitute forward-looking statements or forward-looking information within the meaning of applicable securities laws and are made pursuant to the "safe harbour" provisions of such laws. Statements related to potential benefits of, and demand for, Redline's products including statements with respect to the features and benefits that may be achieved through the use of Redline's products and the relative position of these products vis-à-vis competitive offerings in the industry are forward-looking statements which are subject to certain assumptions, risks and uncertainties. These risks and uncertainties include such factors as rapid technological changes, long uncertain sales cycles, demand for our products, the introduction of competing technologies, meeting industry standards, regulatory risk, dependent on key partners and resellers and other similar factors that may cause the actual results, performance or achievements of Redline to differ materially from the results, performance, achievements or developments expressed or implied by such forward-looking statements. Readers are cautioned not to place undue reliance on such statements. Redline assumes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Starent Networks' Safe Harbor Statement

Any statements in this press release about future expectations, plans and prospects for Starent Networks, including statements about expectations related to the company's multimedia solutions constitute forward-looking statements within the meaning of The Private Securities Litigation Reform Act of 1995. These statements may contain the words "believes," "anticipates," "plans," "expects," "will" and similar expressions. Actual results may differ materially from those indicated by such forward-looking statements as a result of various important factors, including the inability to predict the future success or market acceptance of Starent Networks' multimedia core platform solutions, the highly competitive and rapidly evolving market in which Starent Networks' competes, Starent Networks' limited operating history, the fluctuation of its past operating results, its reliance on a limited number of customers for a significant portion of its revenues and its reliance on a single line of products and other factors discussed in the "Risk Factors" section of Starent Networks' Annual Report on Form 10-K filed with the Securities and Exchange Commission. In addition, the forward-looking statements included in this press release represent Starent Networks' views as of the date of this press release. Starent Networks anticipates that subsequent events and developments will cause its views to change. However, while Starent Networks may elect to update these forward-looking statements at some point in the future, it specifically disclaims any obligation to do so. These forward-looking statements should not be relied upon as representing Starent Networks' views as of any date subsequent to the date of this press release.
