**NEWS RELEASE – FOR IMMEDIATE RELEASE**

**Redline’s broadband wireless products chosen by Public Authority of Industry (PAI) in Kuwait**

*-- PAI enhances operations and communications among hundreds of users throughout its organizations with Redline’s RedCONNEX™ products --*

**TORONTO, ON – June 30, 2009** – Redline Communications Group Inc. (“Redline”) (TSX and AIM: RDL), a leading provider of WiMAX and broadband wireless infrastructure (BWI) products, today announced that the Public Authority of Industry (PAI) in Kuwait has selected Redline’s 5.8 GHz RedCONNEX™ AN-80i products to connect offices via its high-bandwidth Wide Area Network (WAN). The RedCONNEX products will enable PAI to reduce costs, and increase employee productivity, customer service and communications between its head and branch offices in Kuwait.

PAI is a public sector organization providing resources and services to Kuwaiti industries to ensure adherence to international standards and improve their ability to compete globally. PAI deployed Redline’s RedCONNEX AN-80i broadband wireless infrastructure products in a WAN network framework. The AN-80i units enable wireless communications links of up to 24 kilometers, connecting branch offices in Sabhan and Fahaheel to the PAI head office in Surra, Kuwait and supporting the secure delivery of voice, video and data communications.

“Reliability is a key issue in choosing a network product. After researching other competing solutions, we chose Redline’s RedCONNEX AN-80i products which outperformed other products in terms of reliability, speed and the ability to operate under harsh environmental conditions,” said AbdulKareem Taqi, Public Authority of Industry. “Furthermore, RedCONNEX gives us the ability to increase speed in the future with a simple license upgrade as well as the ability to quickly add more users as our organization grows.”

Kuwaiti Canadian Integrated Trading Company, a Redline Certified partner and Kuwaiti based communications integrator, was responsible for deploying the WAN network. Prior to this, PAI relied on a Digital Subscriber Line (DSL) connection which was very slow and could no longer accommodate the requirements of its growing customer and employee base. It also wanted to reduce its dependency on DSL which was expensive and required on-going IT support.

“PAI relies on a number of bandwidth intense applications in order to operate successfully. Redline’s equipment will provide a secure and reliable backbone to support high bandwidth applications such as IP cameras and phones over long distances,” said Kevin Suito, Vice President of Marketing, Redline Communications. “Our RedCONNEX products will also provide the cost savings required in order for PAI to expand and enhance its operations.

PAI plans to integrate its modern IP surveillance system across all buildings into the WAN network this year which is now possible due to the increased bandwidth provided by the RedCONNEX system.

### **RedCONNEX™**

Redline's RedCONNEX family of broadband wireless infrastructure products have been deployed by companies worldwide to support a range of applications including mobile backhaul, video surveillance, storage and business continuity, premium Internet access, and other voice, video and data services. The RedCONNEX product family includes the AN-50e high speed wireless point-to-point (PTP) Ethernet bridge, the AN-30e carrier-grade TDM backhaul solution for mobility and enterprise network operators, and the new AN-80i broadband wireless backhaul solution. Operating in the 4.9 GHz, 5.4 GHz and 5.8 GHz spectrum bands, the AN-80i leverages Redline's proven OFDM technology to deliver industry-leading, high-speed Ethernet throughput up to 90Mbps and flexible software defined configurations. With its exceptional long range capabilities, the AN-80i is able to establish and maintain reliable and highly secure connectivity that can exceed 80 km (50 miles) in clear line-of-sight conditions.

### **RedACCESS™**

Redline's newly-branded RedACCESS family of broadband wireless infrastructure products have been deployed by companies worldwide to support a range of applications including mobile backhaul, video surveillance, storage and business continuity, premium internet access, and other voice, video and data services. The RedACCESS product family includes the AN-50e high speed wireless point-to-multipoint (PMP) Ethernet bridge, and the point-to-multipoint AN-80i broadband wireless backhaul solution. Operating in the 4.9 GHz, 5.4 GHz and 5.8 GHz spectrum bands, the RedACCESS family leverages Redline's proven OFDM technology to deliver industry-leading, high speed Ethernet throughput up to 48Mbps and flexible software defined configurations.

### **About Public Authority of Industry**

On 15 January 1997, Public Authority for Industry was established and it is an autonomous authority under the supervision of the Minister of Commerce & Industry. The purpose of such an establishment was developing, promoting and supervising the industrial activity in the State of Kuwait, through encouraging local industries, protecting and expanding the production base to including strategic goods required for national and nutritional security, and this would diversify national income sources which is a main goal for PAI. In addition, it is in PAI's concern to deepening the industrial awareness of the citizens, and helps propagate studies, coordinate between the existing industries and that proposed for future at GCC and Arabian countries and consolidates the industrial cooperation with different countries and international organization.

### **About Kuwaiti Canadian Integrated**

Kuwaiti Canadian Integrated Trading Company ([www.kcit-kwt.com](http://www.kcit-kwt.com)) is a leading Information Technology professional organization. Since its establishment in the early 1990s, Kuwaiti Canadian Integrated Trading Company (previously Kuwaiti Canadian Computer Systems Company) has served the varied needs of Kuwaiti marketplace with IT integrated solutions and turnkey projects. Market sectors like Oil and Gas, Government, Education, Telco, Finance, Healthcare have benefited by cutting edge and custom IT solutions delivered by Kuwaiti Canadian Integrated Trading Company.

### **About Redline Communications**

Redline Communications ([www.redlinecommunications.com](http://www.redlinecommunications.com)) is the leading provider of fixed and mobile standards-based wireless broadband solutions. Redline's RedMAX™ WiMAX Forum Certified™ system, RedMAX 4C Mobile WiMAX™ products, and its award-winning RedCONNEX™ and RedACCESS™ families of broadband wireless infrastructure products enable service providers and other network operators to cost-effectively deliver high-bandwidth services, including voice, video and data communications. Redline is committed to maintaining its wireless industry leadership with the continued development of WiMAX and other advanced wireless broadband products. With more than 100,000 installations in 85 countries, and a global network of over 170 partners, Redline's experience and expertise helps service providers, enterprises and government organizations roll out wireless broadband networks to support advanced communications.
